# ERGON E

## **SAFETY DATA SHEET**

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or HyVolt III

designation of the mixture

Registration number

UFI:

EU: C500-C029-G00D-DQUF

Synonyms None.

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified usesTransformer OilUses advised againstNone known.

1.3. Details of the supplier of the safety data sheet

**MANUFACTURER:** Ergon, Inc.

P.O. Box 1639

Jackson, MS 39181 USA

**EU Contact:** Ergon International, Inc.

Drève Richelle 161 Building C B-1410 Waterloo, Belgium

**Emergency Phone** 

Numbers:

**US Customer Service:** + 1-800-222-7122

**CHEMTREC:** + 1-800-424-9300 After Business Hours (North America)

+ 1-703-527.-3887 (International),

+32-28083237 (Belgium) +33-975181407 (France) +49-69643508409 (Germany) +39-0245557031 (Italy) +34-931768545 (Spain)

**E-mail:** sds@ergon.com **Poison Centre (Centre** +32022649636

Antipoisons - Belgium):

#### **SECTION 2: Hazards identification**

#### 2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

#### Classification according to Regulation (EC) No 1272/2008 as amended

**Health hazards** 

Aspiration hazard Category 1 H304 - May be fatal if swallowed

and enters airways.

**Environmental hazards** 

Hazardous to the aquatic environment, Category 3 H412 - Harmful to aquatic life with

long-term aquatic hazard long lasting effects.

#### 2.2. Label elements

#### Label according to Regulation (EC) No. 1272/2008 as amended

UFI:

EU: C500-C029-G00D-DQUF

Contains: C18-C50 branched, cyclic and linear hydrocarbons - distillates, Distillates (petroleum),

hydrotreated light naphthenic

**Hazard pictograms** 

Signal word Danger

**Hazard statements** 

Harmful to aquatic life with long lasting effects. H412 May be fatal if swallowed and enters airways. H304

**Precautionary statements** 

**Prevention** 

Do not breathe gas/mist/vapours/spray. P260 Avoid release to the environment. P273

Response

IF SWALLOWED: Immediately call a POISON CENTRE/doctor/. P301 + P310

Do NOT induce vomiting. P331

Storage

P405 Store locked up.

Disposal

Dispose of contents/container in accordance with local/regional/national/international regulations. P501

Supplemental label information

2.3. Other hazards

This mixture does not contain substances assessed to be vPvB / PBT according to Regulation (EC) No 1907/2006, Annex XIII. The mixture does not contain any substances included in the list established in accordance with REACH Article 59(1) for having endocrine disrupting properties at a concentration equal to or greater than 0.1% by weight.

SECTION 3: Composition/information on ingredients

## 3.2. Mixtures

#### **General information**

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
Distillates (petroleum), hydrotreated light naphthenic	30 - 99,6	64742-53-6 265-156-6	01-2119480375-34	649-466-00-2	
Classification:	Asp. Tox. 1	;H304			
C18-C50 branched, cyclic and linear hydrocarbons - distillates	0 - 50	848301-69-9 232-443-2	-	649-262-00-3	
Classification:		1;H224, Muta. 1B;F ronic 2;H411	1340, Carc. 1B;H350, Asp. T	ox. 1;H304,	Р
Distillates (petroleum), hydrotreated light paraffinic	0 - 50	64742-55-8 265-158-7	-	649-468-00-3	
Classification:	-				
Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based	0 - 20	72623-87-1 276-738-4	-	649-483-00-5	
Classification:	-				
2,6-di-tert-butyl-p-cresol	< 0,4	128-37-0 204-881-4	01-2119565113-46	-	
Classification:	Aquatic Ch	ronic 1;H410			

#### List of abbreviations and symbols that may be used above

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

**Composition comments** 

The full text for all H-statements is displayed in section 16. Note P - The harmonized classification as a carcinogen or mutagen does not apply because the substance contains less than 0.1 % w/w of benzene (EINECS No 200-753-7).

## SECTION 4: First aid measures

**General information** Contact physician if discomfort continues.

4.1. Description of first aid measures

**Inhalation** Move to fresh air. Oxygen or artificial respiration if needed. IF exposed or concerned: Get medical

advice/attention.

Skin contact Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated

clothing before reuse. If skin irritation or an allergic skin reaction develops, get medical attention.

Flush thoroughly with water. If irritation occurs, get medical assistance. Eye contact

**Ingestion** Do NOT induce vomiting. If vomiting occurs naturally, have victim lean forward to reduce risk of

aspiration. Call a poison control centre immediately.

4.2. Most important symptoms and effects, both acute and delayed

Defatting of the skin. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

## **SECTION 5: Firefighting measures**

**General fire hazards** 

5.1. Extinguishing media

No unusual fire or explosion hazards noted.

Suitable extinguishing media

Halon. Dry chemicals. Foam. Carbon dioxide (CO2). Water spray or fog. Do not use water jet as

an extinguisher, as this will spread the fire.

Unsuitable extinguishing media

Do not use a solid water stream as it may scatter and spread fire.

5.2. Special hazards arising from the substance or

No unusual fire or explosion hazards noted.

mixture 5.3. Advice for firefighters

> Special protective equipment for firefighters

Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask.

Special fire fighting procedures

Cool containers exposed to flames with water until well after the fire is out. Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Use pressurised air mask if product is involved in a

#### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Local authorities should be advised if significant spillages cannot be contained. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Do not touch or walk through spilled material.

For emergency responders

Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS. Local authorities should be advised if significant spillages cannot be contained. Ensure adequate ventilation.

6.2. Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent entry into waterways, sewer, basements or confined areas. Avoid discharge to the aquatic environment. Contact local authorities in case of spillage to drain/aquatic environment. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Large Spills: ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13.

## SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe dust/fume/gas/mist/vapours/spray. Wash hands after handling and before eating. Avoid prolonged exposure. All handling to take place in well-ventilated area. Shower after work. Remove and wash contaminated clothing promptly.

7.2. Conditions for safe storage, including any incompatibilities

7.3. Specific end use(s)

Store locked up. Keep away from heat, sparks and open flame. Store in a well-ventilated place. Use care in handling/storage.

Observe industrial sector guidance on best practices.

**Exposure guidelines** 

Romania OELs: Skin designation

C18-C50 branched, cyclic and linear hydrocarbons -Can be absorbed through the skin.

distillates (CAS 848301-69-9)

8.2. Exposure controls

Appropriate engineering

Provide adequate ventilation, including appropriate local extraction, to ensure that the defined controls

occupational exposure limit is not exceeded.

Individual protection measures, such as personal protective equipment

**General information** Wear suitable protective equipment. Personal protection equipment should be chosen according to

the CEN standards and in discussion with the supplier of the personal protective equipment.

**Eye/face protection** Goggles/face shield are recommended. Eye protection should meet standard EN 166.

Skin protection

- Hand protection Chemical resistant gloves are recommended. If contact with forearms is likely wear gauntlet style

gloves. Wear suitable gloves tested to EN374.

- Other Chemical/oil resistant clothing is recommended. Launder contaminated clothing before reuse.

Not available. Respiratory protection

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

**Hygiene measures** Always observe good personal hygiene measures, such as washing after handling the material and

before eating, drinking and/or smoking. Routinely wash work clothing to remove contaminants.

Discard contaminated footwear that cannot be cleaned.

**Environmental exposure** 

controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. Fume scrubbers, filters or

engineering modifications to the process equipment may be necessary to reduce emissions to

acceptable levels.

## SECTION 9: Physical and chemical properties

## 9.1. Information on basic physical and chemical properties

**Physical state** Liquid. **Form** Liquid. Colour Water White

Odour Mild Petroleum Odor

-63 °C (-81,4 °F) ASTM D5950/ISO 3016 Melting point/freezing point 287 °C (548,6 °F) ASTM D2887/ ISO 3294

Boiling point or initial boiling point and boiling range

**Flammability** Will burn if involved in a fire.

Flash point >= 135,0 °C (>= 275,0 °F) Pensky-Martens Closed Cup ASTM D93

>= 315 °C (>= 599 °F) ASTM E659 **Auto-ignition temperature** 

**Decomposition temperature** Not determined. Not determined. pН

**Kinematic viscosity** 9,4 mm<sup>2</sup>/s ISO 3104 (40 °C (104 °F))

Solubility

Solubility (water) Insoluble **Partition coefficient** Not applicable.

(n-octanol/water) (log value)

Not determined. Vapour pressure

Density and/or relative density

Relative density 0,88 (20 °C (68 °F) ASTM D4052/ ISO 12185)

Vapour density Not determined.

**Particle characteristics** 

Particle size Not applicable, material is a liquid.

9.2. Other information

9.2.1. Information with regard to physical hazard

No relevant additional information available.

classes

9.2.2. Other safety No relevant additional information available.

characteristics

## SECTION 10: Stability and reactivity

The product is stable and non-reactive under normal conditions of use, storage and transport. 10.1. Reactivity

> SDS FU 8 / 20

10.2. Chemical stability Stable.

10.3. Possibility of hazardous

reactions

Hazardous polymerisation does not occur.

Avoid temperatures exceeding the flash point.

10.5. Incompatible materials

Strong oxidising agents.

10.6. Hazardous

decomposition products

10.4. Conditions to avoid

Upon decomposition, this product emits carbon monoxide, carbon dioxide and/or low molecular

weight hydrocarbons.

### SECTION 11: Toxicological information

**General information** Occupational exposure to the substance or mixture may cause adverse effects.

#### Information on likely routes of exposure

**Inhalation** May be fatal if swallowed and enters airways.

Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis. Skin contact

**Eye contact** May be irritating to eyes.

Ingestion May cause gastrointestinal discomfort if swallowed. Do not induce vomiting. Vomiting may

increase risk of product aspiration. May be fatal if swallowed and enters airways.

**Symptoms** Defatting of the skin. Coughing. Shortness of breath. Discomfort in the chest.

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Based on available data, the classification criteria are not met. **Acute toxicity** 

Components **Test Results** 

2,6-di-tert-butyl-p-cresol (CAS 128-37-0)

**Acute** 

**Dermal** 

LD50 Rabbit > 2000 mg/kg

Oral

LD50 Rat > 6000 mg/kg

Distillates (petroleum), hydrotreated light naphthenic (CAS 64742-53-6)

Acute

**Dermal** 

LD50 Rat > 2000 mg/kg

Inhalation

LC50 Rat  $> 5000 \text{ mg/m}^3$ 

Oral

LD50 Rat > 5000 ma/ka

Skin corrosion/irritation

Serious eye damage/eye

irritation

Not classified. May cause minor irritation on eye contact.

Respiratory sensitisation Not classified.

Skin sensitisation Not classified. May cause defatting of the skin, but is not an irritant.

Based on available data, the classification criteria are not met. Germ cell mutagenicity

Note P - Not classified as a carcinogen or mutagen because the product contains less that 0,1% Carcinogenicity benzene. This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. Meets EU requirement of less than 3% (w/w) DMSO extract for total polycyclic aromatic

May cause defatting of the skin, but is neither an irritant nor a sensitizer.

compound (PAC) using IP 346.

## Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

C18-C50 branched, cyclic and linear hydrocarbons - distillates (CAS 848301-69-9)

Reproductive toxicity Based on available data, the classification criteria are not met. Specific target organ toxicity Based on available data, the classification criteria are not met.

- single exposure

Specific target organ toxicity

repeated exposure

Based on available data, the classification criteria are not met.

**Aspiration hazard** May be fatal if swallowed and enters airways.

Mixture versus substance

information

No information available.

#### 11.2. Information on other hazards

**Endocrine disrupting** properties

This mixture does not contain any substances having endocrine disrupting properties with respect to human health as assessed in accordance with the criteria set out in Regulations (EC) No 1907/2006, (EU) No 2017/2100 and (EU) 2018/605, at a concentration equal to or greater than

**Test Results** 

0.1% by weight.

Other information Risk of chemical pneumonia after aspiration.

## SECTION 12: Ecological information

12.1. Toxicity	armful to aquatic life with long lasting effe	ects.
----------------	-----------------------------------------------	-------

Components		Species	Test Results
Fish	LC50	Fish	35,0274, 96 hours estimated
Crustacea	EC50	Daphnia	13,9652, 48 hours estimated
Acute			
Fish	LC50	Fish	48,675, 96 hours estimated
Crustacea	EC50	Daphnia	800, 48 hours
Aquatic			
HyVolt III			

**Species** 

2,6-di-tert-butyl-p-cresol (CAS 128-37-0)

**Aquatic**

**Aquatic** 

Crustacea EC50 Water flea (Daphnia pulex) >= 2,7 - <= 5,1 mg/l, 48 hoursFish LC50 Rainbow trout, donaldson trout 8,8, 96 hours (Oncorhynchus mykiss) 8,8, 96 hours Acute Crustacea EC50 Water flea (Daphnia pulex) >= 2,7 - <= 5,1 mg/l, 48 hours LC50 Fish Rainbow trout, donaldson trout 8,8, 96 hours (Oncorhynchus mykiss)

12.2. Persistence and degradability

Expected to be inherently biodegradable.

12.3. Bioaccumulative potential

Bioaccumulation is unlikely to be significant because of the low water solubility of this product.

8,8, 96 hours

**Partition coefficient** n-octanol/water (log Kow)

> 2,6-di-tert-butyl-p-cresol 5,1

**Bioconcentration factor (BCF)** 

Not available.

12.4. Mobility in soil

Expected to be slightly to moderately mobile in soil.

12.5. Results of PBT and vPvB assessment

This mixture does not contain substances assessed to be vPvB / PBT according to Regulation (EC) No 1907/2006, Annex XIII.

12.6. Endocrine disrupting properties

This mixture does not contain any substances having endocrine disrupting properties with respect to the environment as assessed in accordance with the criteria set out in Regulations (EC) No

1907/2006, (EU) No 2017/2100 and (EU) 2018/605, at a concentration equal to or greater than 0.1% by weight.

12.7. Other adverse effects

Oil spills are generally hazardous to the environment.

## **SECTION 13: Disposal considerations**

## 13.1. Waste treatment methods

Material name: HyVolt III - Ergon International 4710 Version #: 12 Revision date: 03-May-2023 Issue date: 01-October-2018

SDS FU

10 / 20

**Residual waste** Dispose of in accordance with local regulations. Avoid discharge into water courses or onto the

ground.

**Contaminated packaging** Empty containers should be taken to an approved waste handling site for recycling or disposal.

Since emptied containers may retain product residue, follow label warnings even after container is

emptied. Offer rinsed packaging material to local recycling facilities.

**EU waste code**Waste codes should be assigned by the user based on the application for which the product was

used.

**Disposal** Disposal recommendations are based on material as supplied. Disposal must be in accordance **methods/information** with current applicable laws and regulations, and material characteristics at time of disposal.

## **SECTION 14: Transport information**

#### **ADR**

14.1. - 14.6.: Not regulated as dangerous goods.

**RID** 

14.1. - 14.6.: Not regulated as dangerous goods.

**ADN** 

14.1. - 14.6.: Not regulated as dangerous goods.

**IATA** 

14.1. - 14.6.: Not regulated as dangerous goods.

**IMDG** 

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Maritime transport in

This product is a liquid. Therefore, bulk transport is governed by MARPOL 73/78, Annex I.

bulk according to IMO

instruments

**General information** Not regulated as dangerous goods.

## **SECTION 15: Regulatory information**

## 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

## **EU regulations**

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Regulation (EU) 2019/1021 On persistent organic pollutants (recast), as amended

Not listed

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA Not listed.

UFI:

EU: C500-C029-G00D-DQUF

#### **Authorisations**

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended Not listed.

#### **Restrictions on use**

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

C18-C50 branched, cyclic and linear hydrocarbons - distillates (CAS 848301-69-9)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended.

C18-C50 branched, cyclic and linear hydrocarbons - distillates (CAS 848301-69-9)

Material name: HyVolt III - Ergon International

#### Other EU regulations

## Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

C18-C50 branched, cyclic and linear hydrocarbons - distillates (CAS 848301-69-9)

Other regulations The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP

Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation

(EC) No 1907/2006, as amended.

HyVolt oils are certified to be PCB-free. HyVolt oils are processed from naturally occurring raw

materials with no additives or recycled oils that might introduce PCB contamination.

**National regulations** Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC,

as amended. Germany: WGK 1

15.2. Chemical safety

assessment

The chemical safety assessment has been carried out for the components of the mixture listed in section 3 of the SDS. Exposure scenarios relevant for these substances are annexed to this eSDS.

#### **International Inventories**

Country(s) or region	Inventory name	On inventory (yes/no)*
Australia	Australian Inventory of Industrial Chemicals (AICIS)	Yes
Canada	Domestic Substances List (DSL)	Yes
Canada	Non-Domestic Substances List (NDSL)	No
China	Inventory of Existing Chemical Substances in China (IECSC)	Yes
Europe	European Inventory of Existing Commercial Chemical Substances (EINECS)	Yes
Europe	European List of Notified Chemical Substances (ELINCS)	No
Japan	Inventory of Existing and New Chemical Substances (ENCS)	Yes
Korea	Existing Chemicals List (ECL)	Yes
New Zealand	New Zealand Inventory	Yes
Philippines	Philippine Inventory of Chemicals and Chemical Substances (PICCS)	Yes
Taiwan	Taiwan Chemical Substance Inventory (TCSI)	Yes
United States & Puerto Rico	Toxic Substances Control Act (TSCA) Inventory	Yes

<sup>\*</sup>A "Yes" indicates that all components of this product comply with the inventory requirements administered by the governing country(s)

#### **SECTION 16: Other information**

#### List of abbreviations

CEN: European Committee for Standardization.

PBT: Persistent, bioaccumulative, toxic.

vPvB: Very persistent and very bioaccumulative.

TWA: Time Weighted Average. STEL: Short-term Exposure Limit.

## 1.2. Conditions of use affecting exposure

# 1.2.1. Control of environmental exposure: Use in functional fluids; Industrial (ERC7) Product (article) characteristics

Substance is complex UVCB.

Predominantly hydrophobic

#### Amount used (or contained in articles), frequency and duration of use/exposure

Fraction of EU tonnage used in region 10 %

Regional use tonnage 8700,34 tonnes/year

Fraction of regional tonnage used locally 0,11 %

Annual site tonnage 10 tonnes/day

Maximum daily site tonnage 500 kg/day

Emission days: 20 days per year

Continuous release

#### Technical and organisational conditions and measures

Control measures to prevent releases: Common practices vary across sites thus conservative process release estimates used. Risk from environmental exposure is driven by freshwater. Prevent discharge of undissolved substance to or recover from onsite wastewater. If discharging to municipal sewage treatment plant, no onsite wastewater treatment required. Treat air emission to provide a typical removal efficiency of Air - minimum efficiency of 0 %

#### Conditions and measures related to sewage treatment plant

Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of Waste - minimum efficiency of 0 %

Do not apply industrial sludge to natural soils.

Sewage sludge should be incinerated, contained or reclaimed.

Not applicable as there is no release to wastewater.

Estimated substance removal from wastewater via municipal sewage treatment Waste - minimum efficiency of 88,8 %

Total efficiency of removal from wastewater after onsite and offsite municipal treatment plant) RMMs Waste - minimum efficiency of  $88.8 \,\%$ 

STP effluent: 2000 m3/day

Maximum allowable site tonnage (MSafe): 4591 kg/day

#### Conditions and measures related to treatment of waste (including article waste)

External treatment and disposal of waste should comply with applicable local and/or national regulations.

External recovery and recycling of waste should comply with applicable local and/or national regulations.

## Other conditions affecting environmental exposure

Local marine water dilution factor: 100

4710 Version #: 12 Revision date: 03-May-2023 Issue date: 01-October-2018

Material name: HyVolt III - Ergon International

Local freshwater dilution factor: 10

- . Release fraction to air from process (initial release prior to RMM) 0.01 %
- . Release fraction to wastewater from process (initial release prior to RMM) 0,0001 %
- . Release fraction to soil from process (initial release prior to RMM) 0,1 %

### 1.2.2. Control of worker exposure: Product characteristics General measures applicable to all activities (PROC1 PROC2 PROC4 PROC8a PROC8b PROC9 PROC28)

#### **Product (article) characteristics**

Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

Covers percentage substance in the product up to 100 %.

#### Amount used (or contained in articles), frequency and duration of use/exposure

Duration: Covers daily exposures up to 8 hours

#### Other conditions affecting workers exposure

Covers use at ambient temperatures.°C

#### Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Assumes a good basic standard of occupational hygiene is implemented

#### 1.2.3. Control of worker exposure: Bulk transfers; Dedicated facility (PROC1 PROC2)

#### Technical and organisational conditions and measures

Handle substance within a closed system.

#### 1.2.4. Control of worker exposure: Drum/batch transfers; Dedicated facility (PROC8b)

#### Technical and organisational conditions and measures

No other specific measures identified.

#### Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Ensure no splashing occurs during transfer.

#### 1.2.5. Control of worker exposure: Filling of articles/equipment; Closed systems (PROC9)

#### Technical and organisational conditions and measures

Handle substance within a closed system.

#### 1.2.6. Control of worker exposure: Filling of equipment from drums or containers; Non-dedicated facility (PROC8a)

#### Technical and organisational conditions and measures

Use drum pumps.

#### Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Ensure no splashing occurs during transfer.

## 1.2.7. Control of worker exposure: General exposures; Closed systems (PROC2)

#### Technical and organisational conditions and measures

Handle substance within a closed system.

Sample via a closed loop or other system to avoid exposure.

#### 1.2.8. Control of worker exposure: General exposures; Open systems (PROC4)

#### Technical and organisational conditions and measures

No other specific measures identified.

#### 1.2.9. Control of worker exposure: General exposures; Open systems; Elevated temperature (PROC4)

#### Technical and organisational conditions and measures

Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.

#### Other conditions affecting workers exposure

Assumes process temperature up to 80°C

#### 1.2.10. Control of worker exposure: Remanufacture of reject articles (PROC9)

#### Technical and organisational conditions and measures

Drain or remove substance from equipment prior to break-in or maintenance.

## 1.2.11. Control of worker exposure: Equipment cleaning and maintenance (PROC8a PROC28)

## Technical and organisational conditions and measures

Drain down and flush system prior to equipment break-in or maintenance.

## Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Wear suitable coveralls to prevent exposure to the skin.

Clear spills immediately.

## 1.2.12. Control of worker exposure: Storage (PROC1 PROC2) Technical and organisational conditions and measures

Store substance within a closed system.

## 1.3. Exposure estimation and reference to its source

#### 1.3.1. Environmental release and exposure: Use in functional fluids; Industrial (ERC7)

protection target	Exposure estimate	Method	RCR	
Maximum Risk Characterization Ratios for air emissions		Hydrocarbon Block Method (Petrorisk)	<0,01	
Maximum Risk Characterization Ratios for wastewater emissions		Hydrocarbon Block Method (Petrorisk)	0,73	

## 1.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES

#### Environment

Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

#### Health

Available hazard data do not enable the derivation of a DNEL for aspiration effects.

Predicted exposures are not expected to exceed the DN(M)EL when the risk management measures/operational conditions outlined in section 2 are implemented.

Risk management measures are based on qualitative risk characterisation.

Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Material name: HyVolt III - Ergon International

## 2. ES 2: Use in functional fluids; Professional

#### 2.1. Title section

ES Name: Use in functional fluids; Professional

### 2.2. Conditions of use affecting exposure

# 2.2.1. Control of environmental exposure: Use in functional fluids; Professional (ERC9a ERC9b) Product (article) characteristics

Substance is complex UVCB.

Predominantly hydrophobic

## Amount used (or contained in articles), frequency and duration of use/exposure

Fraction of EU tonnage used in region 10 %

Regional use tonnage 1783,26 tonnes/year

Fraction of regional tonnage used locally 0,05 %

Annual site tonnage 0,89163 tonnes/day

Maximum daily site tonnage 2,4428 kg/day

Emission days: 365 days per year

Continuous release

#### Technical and organisational conditions and measures

Control measures to prevent releases: Common practices vary across sites thus conservative process release estimates used. Risk from environmental exposure is driven by freshwater sediment. Prevent discharge of undissolved substance to or recover from onsite wastewater. If discharging to municipal sewage treatment plant, no onsite wastewater treatment required.

#### Conditions and measures related to sewage treatment plant

Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of Waste - minimum efficiency of  $81,2\,\%$ 

Do not apply industrial sludge to natural soils.

Sewage sludge should be incinerated, contained or reclaimed.

Not applicable as there is no release to wastewater.

Estimated substance removal from wastewater via municipal sewage treatment Waste - minimum efficiency of 88.8% Total efficiency of removal from wastewater after onsite and offsite municipal treatment plant) RMMs Waste - minimum efficiency of 88.8%

STP effluent: 2000 m3/day

Maximum allowable site tonnage (MSafe): 4,0823 kg/day

#### Conditions and measures related to treatment of waste (including article waste)

External treatment and disposal of waste should comply with applicable local and/or national regulations. External recovery and recycling of waste should comply with applicable local and/or national regulations.

## Other conditions affecting environmental exposure

Local marine water dilution factor: 100 Local freshwater dilution factor: 10

- . Release fraction to air from wide dispersive use (regional only) 5 %
- . Release fraction to wastewater from wide dispersive use 5 %
- . Release fraction to soil from wide dispersive use (regional only) 5 %

#### 2.2.2. Control of worker exposure: Product characteristics General measures applicable to all activities (PROC1 PROC2 PROC3 PROC8a PROC9 PROC20 PROC28)

#### **Product (article) characteristics**

Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

Covers percentage substance in the product up to 100 %.

#### Amount used (or contained in articles), frequency and duration of use/exposure

Duration: Covers daily exposures up to 8 hours

#### Other conditions affecting workers exposure

Covers use at ambient temperatures.°C

#### Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Assumes a good basic standard of occupational hygiene is implemented

## 2.2.3. Control of worker exposure: Drum/batch transfers; Non-dedicated facility (PROC8a)

#### Technical and organisational conditions and measures

Use drum pumps.

#### Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Ensure no splashing occurs during transfer.

#### 2.2.4. Control of worker exposure: Transfer from/pouring from containers (PROC9)

#### Technical and organisational conditions and measures

Use drum pumps.

#### 2.2.5. Control of worker exposure: Filling of equipment from drums or containers (PROC9)

## Technical and organisational conditions and measures

Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

#### 2.2.6. Control of worker exposure: General exposures; Closed systems (PROC1 PROC2 PROC3)

## Technical and organisational conditions and measures

Handle substance within a closed system.

Sample via a closed loop or other system to avoid exposure.

#### 2.2.7. Control of worker exposure: Operation of equipment containing engine oils and similar; Closed systems (PROC20)

#### Technical and organisational conditions and measures

Handle substance within a closed system.

#### 2.2.8. Control of worker exposure: Operation of equipment containing engine oils and similar; Closed systems; **Elevated temperature (PROC20)**

### Technical and organisational conditions and measures

Handle substance within a closed system.

#### Other conditions affecting workers exposure

Assumes process temperature up to 80°C

#### 2.2.9. Control of worker exposure: Remanufacture of reject articles (PROC9)

#### Technical and organisational conditions and measures

Drain or remove substance from equipment prior to break-in or maintenance.

## 2.2.10. Control of worker exposure: Equipment maintenance (PROC8a PROC28)

## Technical and organisational conditions and measures

Drain down and flush system prior to equipment break-in or maintenance.

## Additional good practice advice. Obligations according to Article 37(4) of REACH do not apply

Wear suitable coveralls to prevent exposure to the skin.

Clear spills immediately.

## 2.2.11. Control of worker exposure: Storage (PROC1 PROC2)

## Technical and organisational conditions and measures

Store substance within a closed system.

## 2.3. Exposure estimation and reference to its source

## 2.3.1. Environmental release and exposure: Use in functional fluids; Professional (ERC9a ERC9b)

protection target	Exposure estimate	Method	RCR	
Maximum Risk Characterization Ratios for air emissions		Hydrocarbon Block Method (Petrorisk)	0,32	
Maximum Risk Characterization Ratios for wastewater emissions		Hydrocarbon Block Method (Petrorisk)	0,6	

## 2.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES

#### **Environment**

Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

#### Health

Available hazard data do not enable the derivation of a DNEL for aspiration effects.

Predicted exposures are not expected to exceed the DN(M)EL when the risk management measures/operational conditions outlined in section 2 are implemented.

Risk management measures are based on qualitative risk characterisation.

Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.
